Übersicht

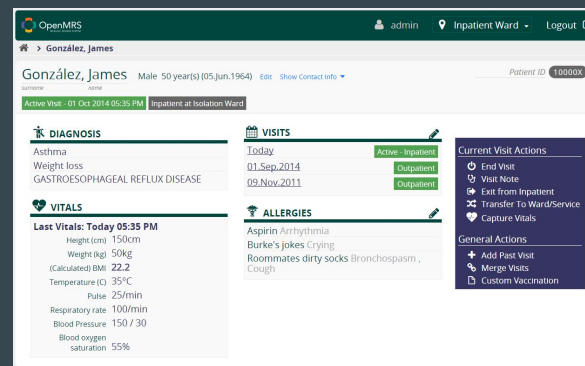

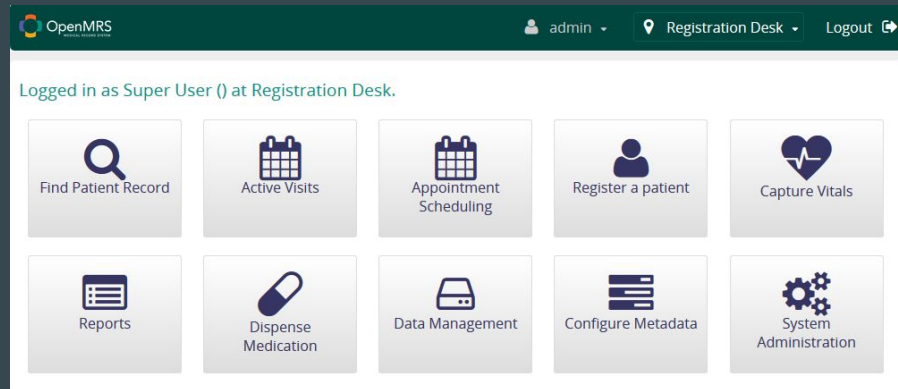

- kurze Vorstellung jedes Open Source Systems
- Vorstellung der Vergleichstabelle
- Fragen?

Open Medical Records System

OpenMRS

- Java, Tomcat, MySQL
- Webanwendung
- sehr aktive dev community
- Bug-Tracking via JIRA
- CI via Bamboo (Atlassian)
- Nutzung komplett kostenlos

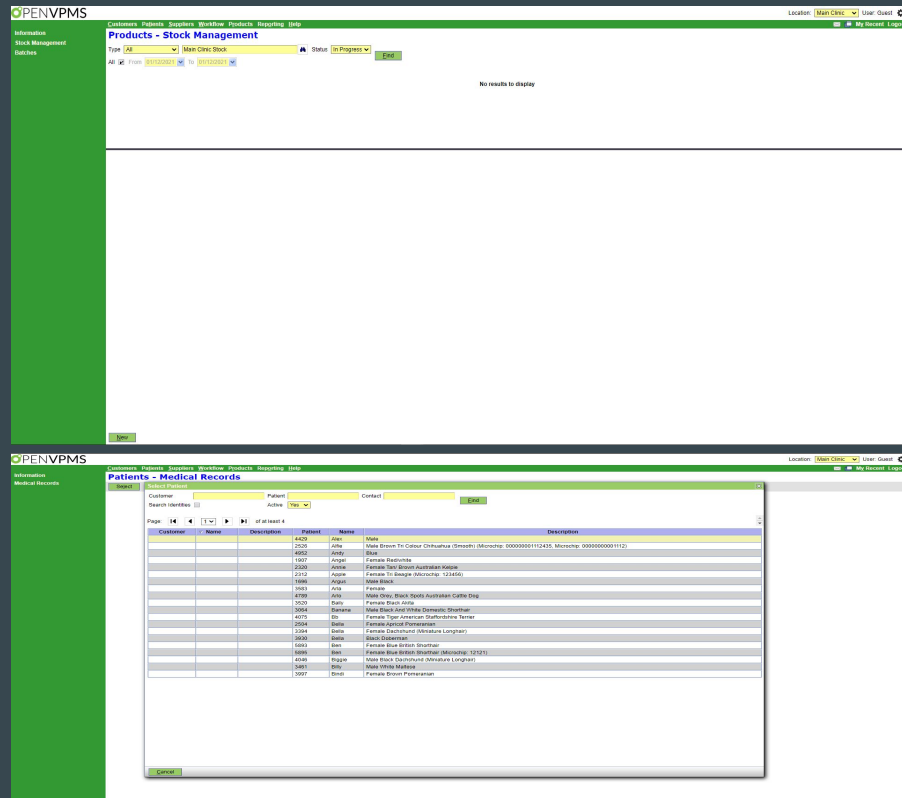

Open Veterinary Patient Management System

OpenVPMS

- Java, JavaScript/TypeScript, HTML, Tomcat, MySQL / MariaDB,
- Webanwendung
- sehr aktive dev und user community
- Bug-Tracking via JIRA
- Deployment Tracking via Bitbucket
- Nutzung kostenpflichtig über ein subscription Modell

Open Electronic Medical Records

OpenEMR

- Java, PHP, JavaScript, Ruby, Python, MySQL
- Webanwendung
- sehr aktive dev und user community
- Bug-Tracking via JIRA
- Nutzung kostenlos, finanziert durch Spenden

The screenshot shows the OpenEMR interface with the calendar view selected. The top navigation bar includes links for Kalender, Fluss Board, Recall Board, Nachrichten, Patient, Homecare, Module, Leistungen, Administration, Berichte, Diverses, Popups, and About. The patient name 'Billy Smith' is displayed at the top right. The calendar for November 2021 is shown on the left, with the 17th highlighted. The main area displays a list of appointments for Billy Smith on that date, including times and names of providers like Alla Barutkar, Lisa Dunge, and Stone, Fred.

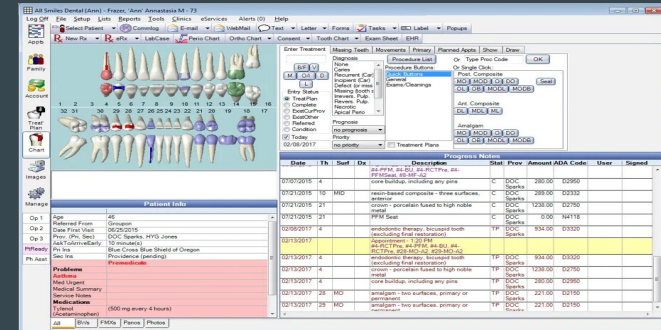

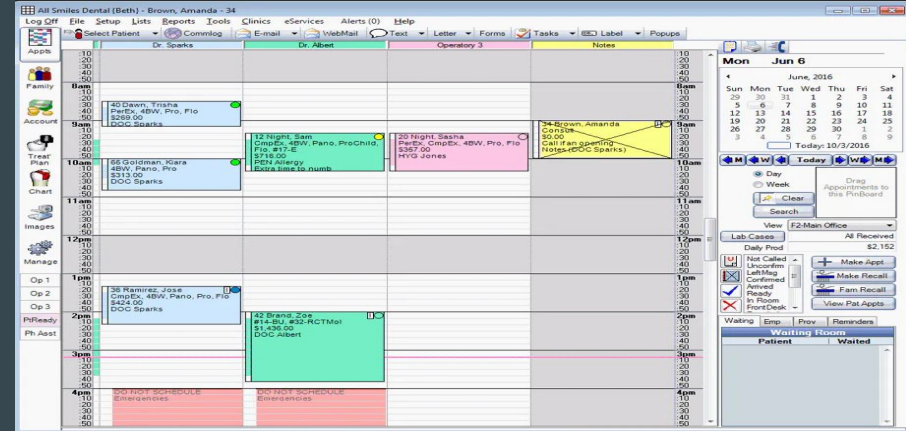

The screenshot shows the 'Patient Suche' (Patient Search) results page. The top navigation bar is the same as the previous screenshot. The search results are displayed in a table with columns for 'Vollständiger Name', 'Tel. privat', 'SSN', 'Geburtsdatum', and 'Externe ID'. The table lists several patients, including Akhouri, Abdul Alf, Barford, Phil, Davis, Brian, Diaz, Jane P, Ellis, Julie, Ermline, Patient, Jordan, Michael, Katrina, Patient L, Ley, Muelte Joseph, and Moon, Wanda. The page also includes search filters and a 'Zurück' button.

Open Dental

opendental

- C#, .NET, MySQL / MariaDB
- Desktop (Fokus auf Windows)
- Entwicklung scheint eher schleppend
- Bug-Tracking (nur known Issues Liste)
- Nutzung kostenpflichtig

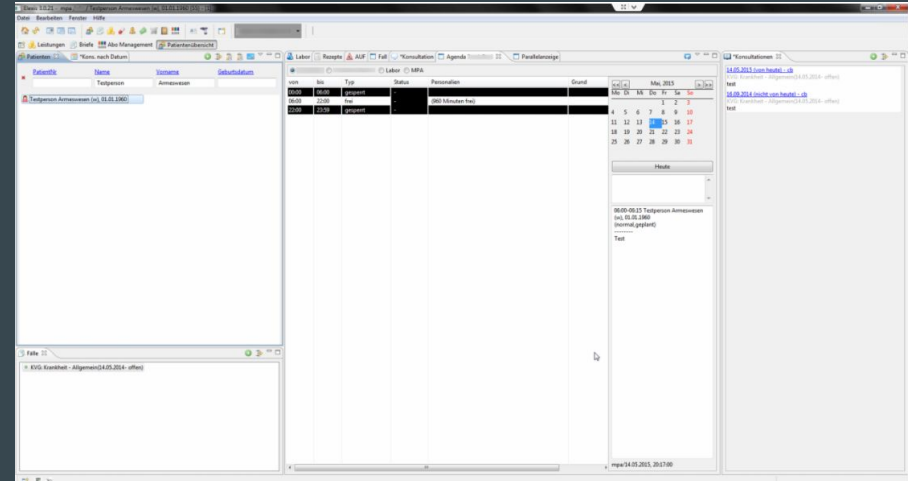

Elexis

elexis

- Java
- Desktop
- Entwicklung langsam, letzte stabile Version von 2018
- Bug-Tracking via Github
- Nutzung kostenlos
